Mr. Small, local editor of the Hous ton Telegraph, made a ringing speech at a fair ground social, the other day. It is highly speken of by the press. "The overflowed widow," is the

latest, and we get it from the low grounds of Louisiana. That's the newest thing under the sun. Shackleford Grange No 191, Me-

Lennan Co., meets first and third Saturday nights, at New Hope Church. W. F. Buck, Master. S. E. WRIGHT, Secretary.

Thanks to the good Comanche folks for an invitation to their Grand Masquerade Ball, to be given June 11, 1874. A merry time, though we find it impossible to accept.

The Stephensville Empire says the printing excitement has "boiled down." Yes but in isn't cooked, its telegraphed.

We acknowledge gratefully the reception of a card of invitation to the festival and ball given by the Dallas bar, on the 28th. We regree exceedingly our inability to attend in but will be present in spiri with the noble fellows, who compose the bar of our sister city of Dallas.

The News complains that Governor Coke makes a distinction between his preference, as an individual, and his convictions of duty, as the executive of a great State. According to the News, impersonal journalism is all right, but impersonal chief magistracy is quite another thing :

"O, what a tangled web we weare When first we practice to deceive?"

The Huntaville Item, of the 16th indulges in a little harmless pleasantry over the recent action of the Wace Bar, in presenting Judge Banton an easy chair. We can say to the Item, that the present was worthily bestowed. and the decisions from that same chair will add somewhat to the population of Huntsville, but we do not expect to send a settler there, half so worthy the location as the brilliant genius who presides over the destinies of the itemized Item.

The News has cast a spell round our neighbor, the Granbury Vidette. We should not regret it, only we are conscious of deserving its non-personal good opinion, as we enjoy that of the majority of its readers, and it, in a recent issue, one by Young, of Georgia, to have Rome, says some ugly things in a bad way. We Ga., selected as a manufacturing arso are serry to see any power on the fron- nal. tier take a false position, that might alienate the friends of that section. We are willing for the Vidette to wear the collar of the News, but are sorry to see it glorify the act. We have frequently to Special Committee on Levess. been able to get in a good word with our merchants for the Vidette. We shall still the proprietors of the Allen steamship do it; not, however, because we think it deserves it, but we want to see the paper sustained, because of the good people among whom it is publis ed.

The News quotes the merest blackguard balderdash from the vilest Radical papers in the State against the Governor of Texas, and yet there are papers, and Democratic ones at that, in the State, that still hold to the News' Democracy. The latest is lians should collect the claim and re from the San Antonio Express. Were there other evidence wanting of the weakness of the News' one-handed fight against Governor Coke, this would furnish it. It is a pity that the blind rage of the News forces it to pay balance to his agents. into such humiliating positions.

It is with more than ordinary pleasure that we give the following extract of the News' summing up of the State Fair results. This is indeed a proud showing for our thrice glorious county, and we regard it as dull and nominal, nothing doing; Good the greatest triumph she has yet Ordinary 16c.; Middling 18c. Gold

achieved: Out of thirty-two entries made from McLennan county twenty-six were awarded premiums. This is a pretty good showing, and speaks well for that frautul and prosperous county. We have been presented with a sample of fine Mustang wine by one of the McLennan county exhibitors, J. E. Sears. FARM MACRINERY.

In the old States, and particularly those poorer naturally than ours, and worn out by reckless and improve dent handling, and where the best result, even with the stimulation of the best brands of guanos, is three hundred pounds of seed cotton to the acre, and grain at the same ratio, the necessity for the late improved labor saving machinery of modern agriculture, is by no means apparent. But here in Texas where our soils are never considered, where land is chesp and already cleared to the farmers' hand; the improvements made in tarm machinery within the last few years, become of the first importance. The amount of land which one man can cultivate by the use of modern implements is truly wonderful, and the results obtained are equal to the best and most eareful efforts of the old hand method. We are glad that some of the best inventive skill of of the land is engaged in fine ing new principles to apply to the task of lessening the labor, and inoreasing the reward of the farmer. The influence of this new state o things is being seen and telt by ou. farmers. Their tields are cleane: their crops more vigorous, and ber ter than all, their bank accounts at a better health than formerly. Here our turiner's brain is not rack

ed by the effort to make his had proluce, the only tear is whether he wi be able to cultivate it thorough, and keep the grass and weeds in du subjection. But with, and by the inproved machinery of the farm, the ask has been lightened to a wonder iul degree, and he has time for othe asks. He can spare some of the time to the cultivation of an other cro, (ideas) which may command as muci in market as cotton or corn either.
